CL2 Series

Incorporating technical progress into existing product lines is our constant endeavor. We have re-selected technical components, made design changes, while leaving the design and design features of the products unchanged.

Here are the main innovations in both CL2 product lines:

Technical improvements:

- Quiet motor: a very quiet motor (< 42 dB) ensures a more pleasant working atmosphere.

- New intuitive control element: The self-explanatory toggle switch and the control elements, which have won the Red Dot Design Award and the German Innovation Award, underline their outstanding quality and aesthetics.
- Large stroke range: Our CL2 series sit-stand table now also offers a large stroke range of 650 – 1280 mm to serve a larger user group and provide individual comfort.
- The CL2 series is available with fixed and sliding tops for comfort electrification. The usual choice of frame colors and finishes remain.

Good to know: The CL2 series as a compact class is very attractive in price.

Product features

Product family:

- Electric motorized sit-stand tables
- Optional C-foot or T-foot with slight curvature, high stability, foot shape square tube
- **Control element**: The control element is design-awarded and self-explanatory
- The operation is intuitive and barrier-free by toggle switch
- Premium collision protection: Our table is equipped with a premium collision protection as a standard feature
- Work tables with electromotive height adjustment: three-column (650 – 1280 mm). Large lifting range to serve a larger user group and provide individual comfort.
- Control element mounted in the frame, leaving the cable channel free: this provides a tidy look inside the cable channel and offers more space.
- Table top thicknesses: 19 and 25 mm
- **Columns and control**
- The electromotive tables move at a very comfortable speed of 50 mm/sec
- The drive is perceived as very quiet with a noise level of < 42 dB
- The power consumption is very low at 0.1W
- The start-up behavior of the tables is very quiet and smooth

Electrification

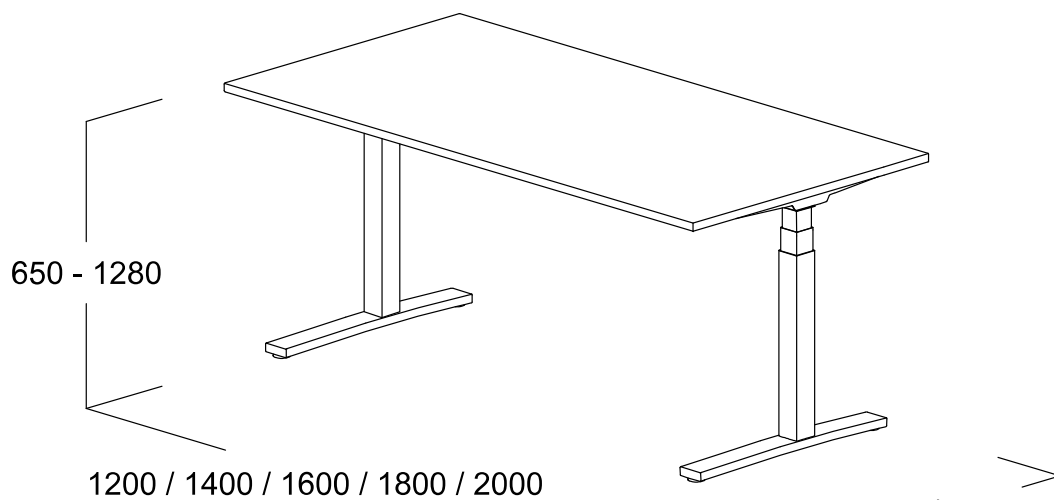

Electrification options

ophelis

- Fixed table top with fold-down cable duct
- Sliding table top function optional with recessed brush seal at the rear edge of the table
- Cable duct free of control element – thus more space in the cable duct
- Clean cable management through flexible cable chain or cable stocking for guiding cables up to standing height as well as steel cable duct for invisible cable routing on the leg; handling: easily removable without tools through clip fastening
- Netbase: For direct, convenient access to power and data connections with brush for dust-proofing and for fixing cables (only with fixed table top)
- Netbox: Connections are directly accessible to the user at the table – can be individually equipped with power and data connections
- Cable outlets: round or angular (only with fixed table top), can also be attached to the rear edge of the table (with fixed table top and sliding table top)
